

Dear Sir/Madam,

The Harlequin Group act on behalf of EE Ltd in the identification and acquisition of sites suitable for the installation of mobile phone equipment.

Our client currently has a requirement for a telecommunications site to provide coverage to the above area.

We have identified an area of roadside verge, which appears suitable for the equipment.

I would be obliged if you would confirm that the land shown on the below is under Raunds Town Councils ownership and is maintained by the Town Council.

I would also be grateful if you would confirm that the Town Council has no objections to an installation in this approximate location and that the location is not a protected, special or traffic sensitive street and that there are no Section 58 Restriction Notices in place.

I am looking to schedule a survey at this location to further determine its viability to host a telecommunications site and would like the Town Councils approval for this to go ahead. This survey will involve digging a small hole to establish the presence of any underground services.

If you have any queries or issues, please do not hesitate to contact myself on one of the below numbers.

Proposed location

Approx. NGR – 499318 / 272283

Address – Titty Ho, Raunds, East Northamptonshire, NN9 6DF

Kind regards,

Tarns
